Professional Experience

Healing & Transformation Coach (2022–Present)

Self-employed – Online & Workshops

I combine principles of **Psychology, Manifestation, and Neurographica Art Therapy** to help individuals understand and transform their inner experiences. Through psychology, I help people recognize how their **behaviors, personalities, thought patterns, stuck emotions, and beliefs** are formed. Using manifestation principles, I guide them to see how they are **subconsciously creating their current reality** through unaware habits and repetitive emotional patterns. With **Neurographica Art Therapy**, clients learn to **resolve any thought or trauma**, visually explore how their personality and wounds were created, and reprogram limiting patterns into new, empowering ones.

Over the past few years, I have conducted **500+ one-on-one sessions** with individuals dealing with **anxiety, depression, OCD, narcissistic personality disorder, and addiction**, helping them feel emotionally safe and supported in their healing journey through non-medicinal approaches.

Software Engineer – Toothsi, Bengaluru (2021–2022)

- Developed backend services for dental tech platforms, enhancing patient experience and operational efficiency.
- Improved scalability and stability of booking and customer management systems.

Software Development Engineer – OYO Vacation Homes, Bengaluru (2019–2020)
